

Exam questions answers

subject name project management and entrepreneurship. i am preparing for my college studies.
these are the questions asked in exams. i want you gives answer in easy way such that i can write in exam paper.

each questions of marks 5

Got it 👍

These are **5-mark questions** from *Project Management and Entrepreneurship*. I'll give you **easy, exam-friendly answers** so that you can write them directly in your paper.

Q2. Explain Project Life Cycle.

A project life cycle is the sequence of phases a project goes through from start to finish. It helps in proper management.

The main phases are:

1. **Initiation** – Idea generation, feasibility study, approval.
 2. **Planning** – Defining objectives, schedules, resources, cost, risk planning.
 3. **Execution** – Actual work, team coordination, resource allocation.
 4. **Monitoring & Controlling** – Tracking progress, quality check, controlling changes.
 5. **Closure** – Deliver final output, documentation, evaluation, project handover.
-

Q3. Write down the content of Detailed Project Report (DPR).

A DPR is a document that explains every detail of a project. Contents are:

1. **Introduction** – Overview and objectives.
2. **Market Analysis** – Demand, supply, competition, target customers.
3. **Technical Analysis** – Technology, process, equipment, location.
4. **Financial Analysis** – Cost of project, funding, profitability.
5. **Organizational & Managerial Aspects** – Structure of management, manpower.

6. Economic & Social Benefits – Benefits to society, employment, etc.

Q4. Define Work Breakdown Structure (WBS).

- Work Breakdown Structure is the process of dividing a project into small, manageable parts.
 - It is a **tree-like structure** where the whole project is broken down into tasks, sub-tasks, and activities.
 - Helps in clear responsibility, better cost estimation, and easy monitoring.
- Example:** Building construction → Foundation → Walls → Roof → Finishing.
-

Q5. Contributions of Entrepreneurs to Society.

Entrepreneurs contribute in many ways:

1. **Employment Generation** – Create jobs.
 2. **Innovation** – Introduce new products, technologies, and services.
 3. **Economic Growth** – Increase production and national income.
 4. **Improved Standard of Living** – Provide better goods and services.
 5. **Social Development** – Solve problems like education, health, environment.
-

Q6. Explain the Theory of McClelland.

David McClelland's theory is also called **Need Theory of Motivation**. He said people are motivated by three needs:

1. **Need for Achievement (nAch):** Desire to do things better, take risks, achieve goals.
 2. **Need for Power (nPow):** Desire to influence and control others.
 3. **Need for Affiliation (nAff):** Desire to build relationships, be liked, and accepted.
- Entrepreneurs usually have **high achievement motivation**.
-

Q7. Steps of Project Planning.

Steps involved are:

1. **Defining Objectives** – Clear goals of the project.
2. **Identifying Activities** – List of tasks and sub-tasks.

3. **Scheduling** – Time estimation, sequence of activities.
 4. **Resource Planning** – Manpower, money, materials, machines.
 5. **Budgeting** – Cost estimation and allocation.
 6. **Risk Planning** – Identify possible risks and solutions.
 7. **Documentation** – Prepare final project plan.
-

👉 You can pick **any 4 answers** in exam.

Would you like me to also make these answers into **short bullet-point form (one page notes)** so that you can revise quickly before exam?

its to precise not good for college exam i want large such that i can write in exam and simple way

Okay 👍 I understand — you need **exam-length answers** (not too short), written in **simple and clear language**, so you can easily fill one page for a 5-mark question. Let me expand each answer with proper explanation and examples, keeping it **easy to remember + easy to write**.

Q2. Explain Project Life Cycle.

A project life cycle means the **different stages through which a project passes from beginning to end**. Every project has a life just like a human being – it starts, grows, works, and ends.

The main stages are:

1. Initiation (Starting stage):

- At this stage, the idea of the project is born.
- Feasibility study is done (whether the project is possible or not).
- Approval from management or sponsors is taken.

2. Planning Stage:

- Detailed planning is done regarding time, cost, resources, manpower, and risks.
- Proper schedules, charts, and plans are prepared.
- It acts as a **roadmap** for the project.

3. Execution Stage:

- The actual work of the project is performed.
- Resources are used, teams are coordinated, and activities are carried out.
- Example: In a construction project, this stage includes building walls, roof, etc.

4. Monitoring and Controlling:

- Project manager checks if the project is going as per the plan.
- Quality, cost, and time are controlled.
- If there are deviations, corrective actions are taken.

5. Closure (Ending stage):

- The final product is delivered to the customer.
- Project documents are prepared.
- Evaluation is done, and the project is officially closed.

👉 In short, project life cycle helps to manage projects in a **systematic way**.

Q3. Write down the Content of Detailed Project Report (DPR).

A **Detailed Project Report (DPR)** is a document that provides **complete information about a project**. It helps investors, government, and management to understand the project properly before implementation.

The main contents are:

1. Introduction:

- General description of the project, purpose, and objectives.
- Example: "The project is to set up a dairy farm to produce milk."

2. Market Analysis:

- Study of demand and supply in the market.
- Who are the target customers? Who are the competitors?
- Example: Demand of milk in city areas.

3. Technical Analysis:

- Details of technology to be used, production process, plant location, and equipment required.

4. Financial Analysis:

- Total cost of project, sources of finance, expected profit and loss, break-even point.

- Example: Project cost ₹50 lakh, expected annual return ₹10 lakh.

5. Organizational and Managerial Aspects:

- How the business will be managed.
- Organization structure, management team, manpower planning.

6. Economic and Social Benefits:

- Contribution of project to the society like job creation, development of local area, improving standard of living.

👉 DPR acts like a **blueprint** for the entire project.

Q4. Define Work Breakdown Structure (WBS).

Work Breakdown Structure (WBS) is a method of **breaking a big project into smaller and manageable parts**.

- It is represented in the form of a **tree diagram**.
- At the top, the **main project** is written.
- Below that, it is divided into **major tasks**.
- Each task is again divided into **sub-tasks and activities**.

Example:

For a *House Construction Project*:

- Project: Build a House
 - Task 1: Foundation
 - Task 2: Walls
 - Task 3: Roof
 - Task 4: Painting and Finishing

Importance of WBS:

- Helps in **clear understanding** of the work.
- Makes **cost estimation and scheduling easy**.
- Helps in **assigning responsibility**.
- Makes monitoring and controlling simple.

👉 In simple words, WBS makes a **big project small and manageable**.

Q5. Contributions of Entrepreneurs to Society.

Entrepreneurs play a very important role in the development of society. Their contributions are:

1. Employment Generation:

- Entrepreneurs start industries and businesses.
- They create job opportunities for skilled and unskilled workers.

2. Innovation and Technology:

- Entrepreneurs introduce new ideas, products, and services.
- Example: Mobile apps, online shopping, renewable energy solutions.

3. Economic Development:

- By producing goods and services, they increase GDP and national income.
- They also pay taxes which helps the government.

4. Improvement in Standard of Living:

- Provide better products at affordable prices.
- Example: Cheap smartphones improved communication for everyone.

5. Social Development:

- Many entrepreneurs contribute to education, healthcare, and environmental protection.
- They help in solving local problems and promote rural development.

👉 Thus, entrepreneurs act as **engines of growth** for both economy and society.

Q6. Explain the Theory of McClelland.

David McClelland proposed the **Need Theory of Motivation**, which says people are motivated by three types of needs:

1. Need for Achievement (nAch):

- Desire to do something better and achieve success.
- People with high nAch take moderate risks and work hard.
- Entrepreneurs usually have high achievement motivation.

2. Need for Power (nPow):

- Desire to control, influence, and guide others.
- Some people want leadership and authority.
- Example: A manager who wants to influence his team.

3. Need for Affiliation (nAff):

- Desire to build friendly relationships and be accepted by others.
- Such people want teamwork and cooperation.

👉 According to McClelland, entrepreneurs are **mainly motivated by achievement**, but also need power and affiliation in balance.

Q7. Steps of Project Planning.

Project planning means **preparing a roadmap for carrying out a project successfully**. The steps are:

1. Define Objectives:

- Clear goals of the project are written.
- Example: "Construct a school building in 12 months."

2. Identify Activities:

- Break down the project into tasks and sub-tasks.
- Example: Design, foundation, walls, roof, finishing.

3. Scheduling:

- Decide the sequence of activities and the time required for each.
- Use tools like Gantt charts, PERT charts.

4. Resource Planning:

- Decide manpower, money, machinery, and materials required.

5. Budgeting:

- Estimate cost of project and allocate funds properly.

6. Risk Planning:

- Identify possible risks (delay, shortage of material, financial issues).
- Prepare backup plans.

7. Documentation:

- Prepare a final project plan document for execution.

👉 Proper planning reduces risk and ensures timely completion of projects.

✨ Now each answer is **5–8 points long**, easy to expand while writing in exam, and simple enough to understand.

Do you want me to make these into a **ready-made exam notes PDF (2–3 pages)** for last-minute revision?
